Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-15 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1, 9, 14 and 15 all recite in the preamble that the method obviates the need to adjust radio parameters during testing which is a functional statement which has no clear metes and bounds and is given no patentable weight.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-15 are rejected under 35 U.S.C. 102(b) as being anticipated as understood by Easley et al..

The patent to Easley et al. discloses a RF generator with an Encoder 38 and a decoder 48 and computer 30 for controlling a vehicle audio system to balance the drivers. A microphone in the vehicle is used to detect tones and the system evaluates the tones.
